

LittleGIANT®

5 SERIES

THE NEXT GENERATION

Both inside and out, we build performance into every inch of the Little Giant 5-Series' compact design. Now we're strengthening the durability features while maintaining the tried-and-true performance you know and trust.

FEATURES & BENEFITS

1. Both corrosion- and rust-resistant, the epoxy-coated aluminum pump housing gives strength and high heat dissipation.
2. Multiple switch options for automatic operation creates application flexibility.

NEXT-GEN UPGRADES

3. Compact design with manual version weighing in just under seven pounds for portability makes this pump a true Little Giant.
4. 1/6 HP energy-efficient and oil-free PSC motor is environmentally friendly and delivers 1500 gph at maximum capacity.
5. FKM triple-lip seals plus upper and lower ball bearings for long pump life
6. In manual operation, pumps down to 1/8" with screen and down to 1/16" without screen.
