

RETROFIT SPLIT-TABBED CHROME PLATED WALL PLATES

**CHROME
PLATED**

Heavy duty chrome plated forged brass split with locking tabs and set screw. Fits around existing pipe and can be used in retrofit applications.

Designed to cover hole in wall or floor structure around pipe. Not intended for stabilization of pipe penetrating wall or floor structures.

Each wall plate has been chrome plated for aesthetics and is provided with a set screw to keep the wall plate in place.

Available in sizes 1" IPS through 6" IPS.

Installation:

Each wall pipe should be installed on the corresponding pipe size to maintain proper fit and performance. The split and tabbed wall plates allow for installation after the pipe is in place. Tighten the set screw while maintaining the wall plate in its' desired final location. The split and tabbed wall plate is not designed to be used to prevent the movement of pipe through the "wall" or floor penetration. It is necessary to use one wall plate on each side of the wall or floor to secure the pipe from additional movement. This product is not suitable or approved as earth quake bracing.
